Company

COSA BV is one of the pioneers in the sector of intelligent Workflow- Business Process Management (BPM)- and Document Management systems since the early 90s.

Our success is mainly determined by the quality of our product and by the commitment and competence of our personnel. Being familiar with entrepreneurial thinking, they understand our customer's requirements and provide the technical and economic know-how to implement sector- and country-specific solutions. Our philosophy is confirmed by successful long-term customer relations with international groups and public authorities.

As a founding member of the international Workflow Management Coalition (WfMC - a consortium of scientists and business experts), we have been forwarding accepted Workflow standards for more than 15 years. Still today, we are among the trend-setters on the BPM market. Another essential part of our company strategy is to consider upcoming standards at an early stage. Start the future with COSA – The BPM Experts.
