

## Partner

Together for Success &ndash; the COSA BPM Partner Concept

Customer focus is our first priority. Partnerships are part of the COSA philosophy to fulfill individual customer requirements and offer excellent service.

Partners are not only local sector specialists but also international consulting companies and technology partners that cooperate with COSA regarding the further development of our BPM Suite.

The partner network also plays an important role in the further development of our product. The cooperation ranges from regular exchange of information up to a joint strategy and product development. Our partners' market experiences are essential for our customer focus.
