

## Credit Factory

### The Modern Credit Factory

The Hypotheken Management GmbH is the first service provider of mortgage processing who uses COSA as control instrument for the credit factory.

The "Financial Processing Factory" processes and administers credit portfolios for customers. COSA controls the process – from the fully automated credit processing via approved and scaleable credit scoring up to administering credit cards and loan portfolios. Electronic dossiers are an integral component in credit processing.

The use of COSA technology at Hypotheken Management GmbH has contributed to reducing process costs and accelerating order processing and thus to strengthening the position as market leader.

Among the services of Hypotheken Management GmbH are credit processing and administrative tasks in the area of construction financing. With this service, Hypotheken Management GmbH pursues an innovative concept of credit processing.
